

November 13th Software Updates

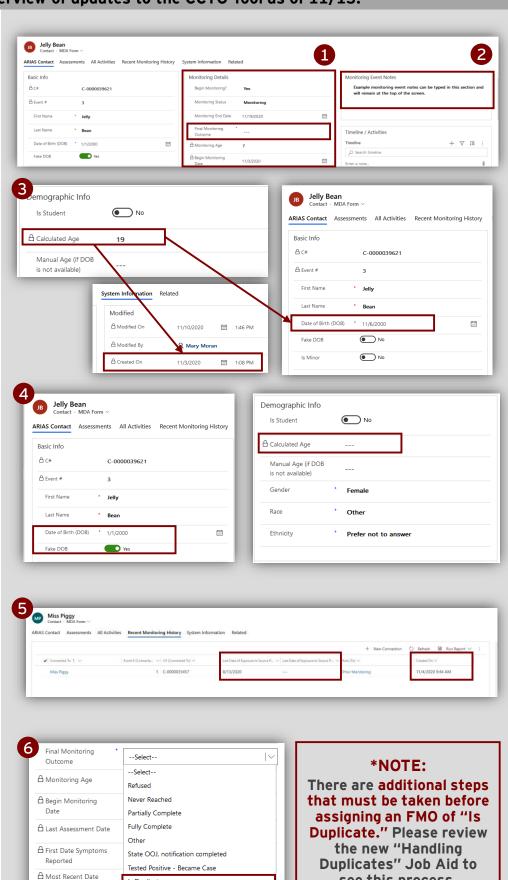

COVID-19 Community Team Outreach

See below for an overview of updates to the CCTO Tool as of 11/13:

Contact Profile Updates

- 1. The Monitoring Details box has been moved to the top of the screen, and "Final Monitoring Outcome" has been moved below "Monitoring End Date."
- 2. A free-text box called Monitoring Event Notes has been added above Timeline/Activities for any critical reference information that should be quickly visible to the tracer working this contact. Notes within Timeline/Activities can still be used if desired. Any information deemed critical can be copied from a Timeline/Activities note into Monitoring Event Notes.
- 3. "Calculated Age" is now generated from "Date of Birth" and "Created On" (instead of "Date of Birth" and the current date). This means that "Calculated Age" will lock based on the date that the contact was created, and a contact's "Calculated Age" will not change if they have a birthday during monitoring.
- 4. A toggle for "Fake DOB" can be turned on to indicate if a contact has refused to provide their actual date of birth and instead provides a placeholder to facilitate digital assessments. A fake DOB should be provided by the contact, as they will need to remember this date to access digital assessments. Turning on "Fake DOB" prevents "Calculated Age" from populating.
- 5. The Recent Monitoring History page on contact profiles will now show columns for "Created On." "Last Date of Exposure to Source Patient #1," and "Last Date of Exposure to Source Patient #2."
- "Final Monitoring Outcome" can now be 6. set to "Is Duplicate" or "Monitored In Other System" to document contacts created as duplicates* or contacts who will be monitored elsewhere (e.g., by a military base that is NOT using CCTO).

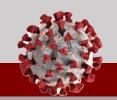

Is Duplicate

Reported

see this process.

November 13th Software Updates

COVID-19 Community Team Outreach

See below for an overview of updates to the CCTO Tool as of 11/13:

Automatic Updates to Contact Profile Fields at Deactivation

When a contact is **deactivated**, certain fields will now update automatically:

- 1. ...under *Monitoring Details*:
 - "Begin Monitoring" will be set to "No" if it has not already been done.
 - "Monitoring Status" will be set to "Monitoring Ended" if it has been set to "Monitoring" or "Monitoring Paused."
- 2. ...under Testing Details:
 - "Tested?" will be set to "Yes" if it is left blank and "COVID-19 Test Result" is set to "Positive," "Negative," or "Unknown."
- 3. under For Public Health Use Only:
 - "Contact or Case Patient" will be set to "Contact who became a case" if "Final Monitoring Outcome" is set to "Tested Positive - Became Case."

Automatic Updates to Contact Profile Fields At Any Time

These updates occur in real time **while** editing a contact:

- 1. If **"Final Monitoring Outcome"** is set to **"Refused"** or **"Never Reached"**:
 - "Gender" will be set to "Unknown" if it has been left blank.
 - "Race" will be set to "Unknown" if it has been left blank.
 - "Ethnicity" will be set to "Unknown" if it has been left blank.
- If "Contact or Case Patient" is set to "Contact who became a case," a clickable lightbulb will appear next to "Final Monitoring Outcome" to remind you to update this to "Tested Positive -Became Case."
