

NC COVID Electronic Case Reporting (eCR)

May 2022

Trainings: ncedsstrainings@dhhs.nc.gov

Helpdesk: NCEDSSHelpDesk@dhhs.nc.gov

eCR General Information

Context

- The Department of North Carolina Health and Human Services (NCDHHS), Division of Public Health has implemented Electronic Case Reporting (eCR) for COVID.
- Public health relies on reports from physicians (case reports) and laboratories (laboratory reports) to manage communicable disease.
 - Historically, both reports were provided to public health via combinations of methods, including fax, phone, and mail. These reporting methods are time consuming and problematic due to missing or incorrect information.
 - Fifteen years ago, the process for reporting laboratories data electronically was introduced. Today over 80% of laboratory reports are delivered electronically.
 - Now we are working with providers to collect case reports electronically to save time and resources for both the providers expected to send the reports and the LHD staff as they follow up on cases of disease.

eCR Benefits

Provides critical clinical data directly from healthcare provider for better surveillance and response.

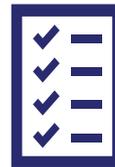

Accelerates response

Efficiently monitors the spread of reportable diseases

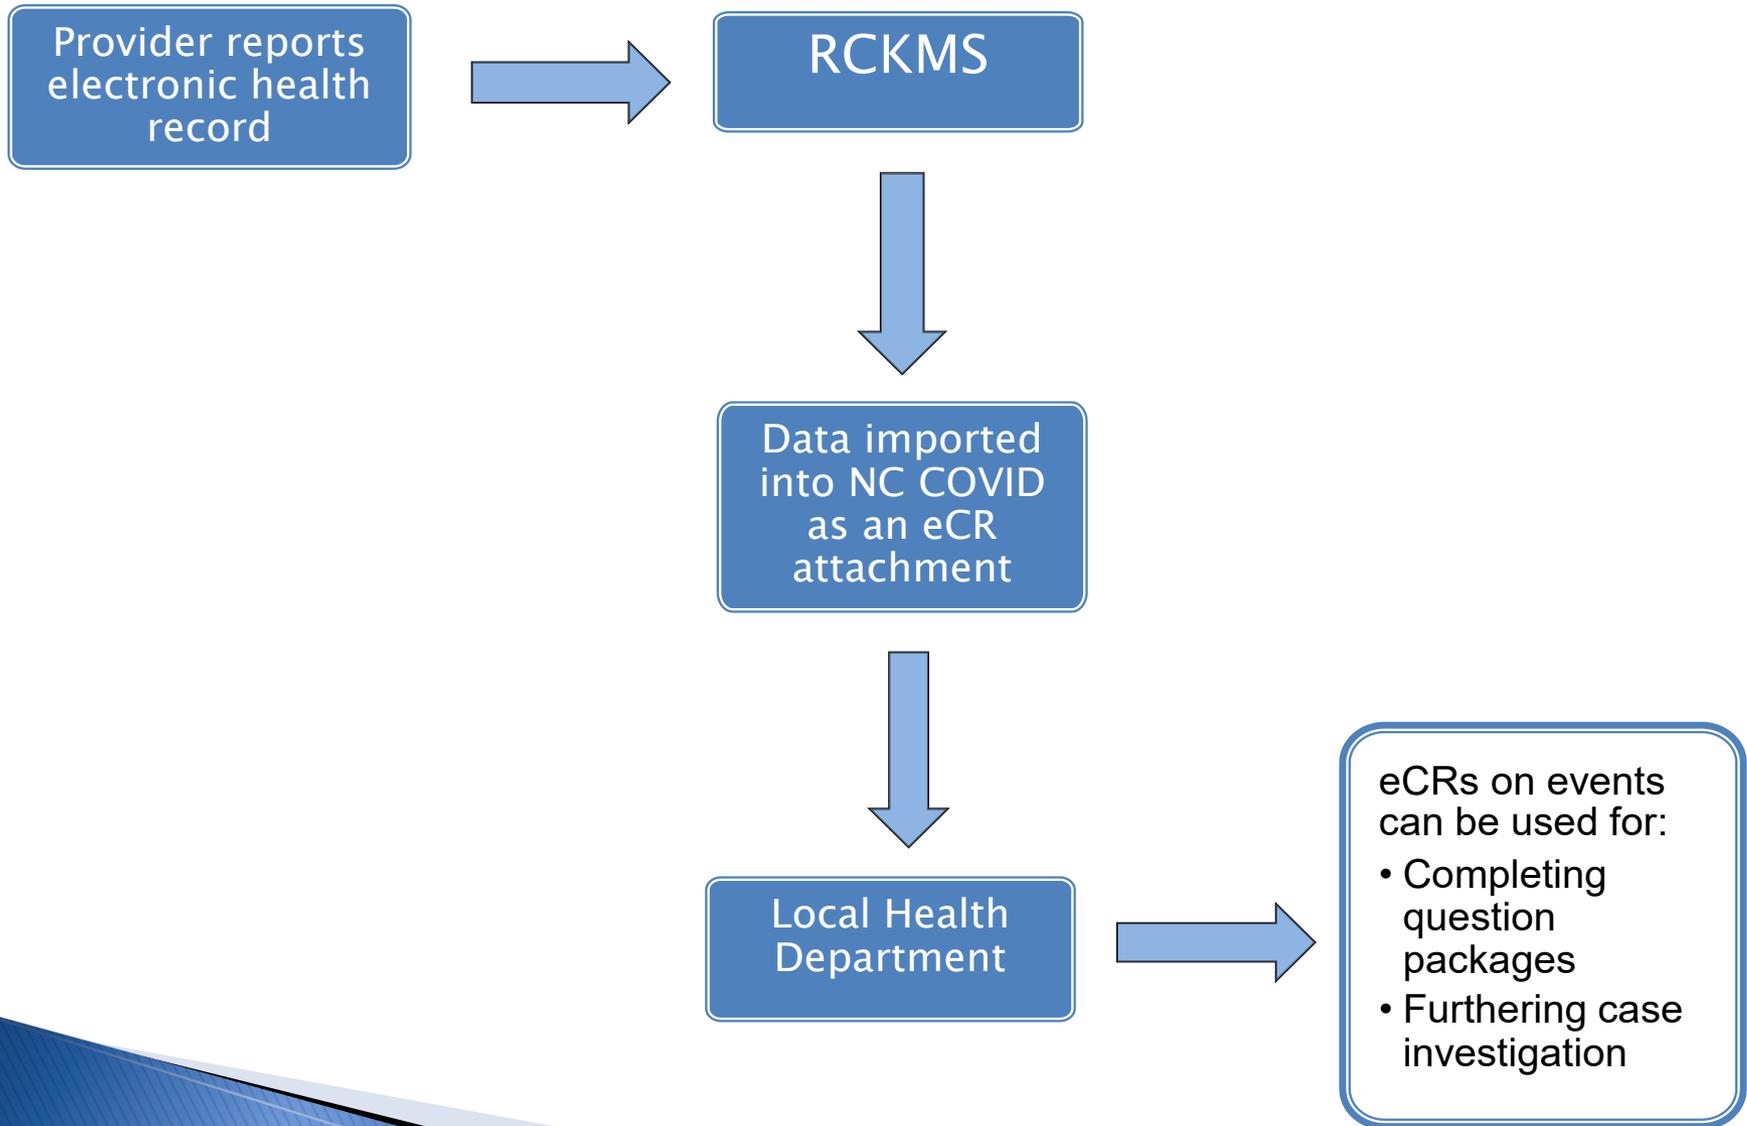

Improves communication with healthcare

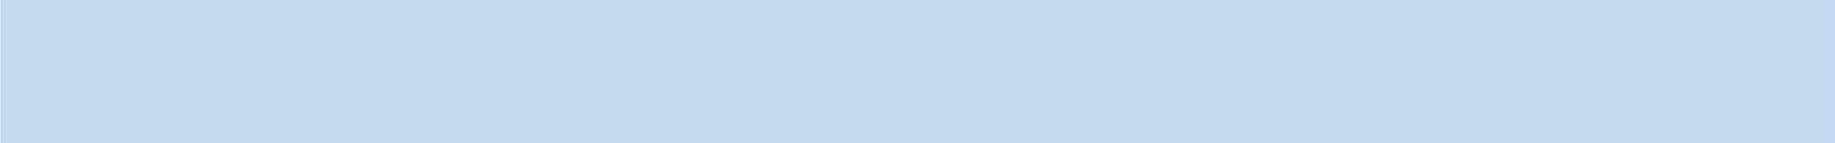

Reduced manual data entry and provides more complete data

eCR Reporting Process

eCR Current Status

- COVID Only
- Current Senders– UNC, Vidant, OCHIN, Orange County HD, Pitt County HD, Sentara, Premise Health
- Demographics updated may include
 - Phone Numbers
 - Email Address
 - Race
 - Ethnicity
- eCRs will be attached to appropriate NC COVID events, Note: after 60 days the eCR attachment is deleted
- eCRs will replace the Part 1 form for COVID beginning May 2022

eCR Scenarios

eCR Scenarios

There are two primary scenarios how eCRs may import to events:

1. An eCR is imported to an existing event with a pre-existing lab (either entered or imported)
2. An eCR is imported to a new event with no lab

Note: The following 2 scenarios are based on sample eCRs (no real PII is included)

Scenario 1 – eCR on existing event

Scenario 1: An eCR is imported onto an existing event that has a lab

Event Summary x

[Add Attachment](#) [Dashboard](#) [Help](#)

To open the eCR, click the [Download](#) hyperlink

Note: an eCR is a medical record extract and may contain data that is not relevant to the current diagnosis. The data contained in the eCR should be treated the same as any medical record with the same level of confidentiality. Every precaution should be taken when downloading these files. If you have access to a shared drive, you should download to a shared location. All attachments should be deleted as soon as your review is complete.

Scenario 2 – eCR creates a new event

Scenario 2: An eCR is imported onto a new event with no lab

Event Summary x

Note: an eCR is a medical record extract and may contain data that is not relevant to the current diagnosis. The data contained in the eCR should be treated the same as any medical record with the same level of confidentiality. Every precaution should be taken when downloading these files. If you have access to a shared drive, you should download to a shared location. All attachments should be deleted as soon as your review is complete.

Scenario 2 – eCR creates a new event

An eCR that creates a new event will update the Disease Report Information section of the Administrative package:

- Initial Source of Report to Public Health = Physician/Provider
- Date of Initial Report to Public Health (Required) = Report Date
- Initial method of report = eCR

Disease Report Information	
## Initial Source of Report to Public Health	Physician/Provider ▼
## Date of Initial Report to Public Health (Required)	04/22/2022 
## Initial method of report	Electronic Case Report (eCR) ▼

Scenario 2 – eCR creates a new event

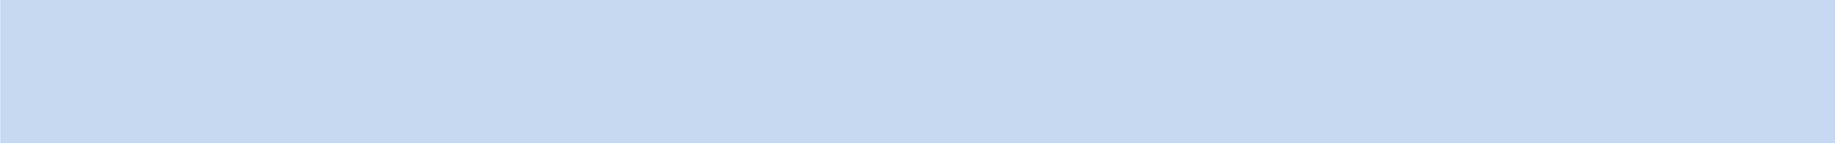

An eCR that creates a new event will set the Classification Status in the Investigation Trail to “Under Investigation”

Investigation Trail: Add a new entry for each group to which the event transfers during the investigation		
## Date Assigned-Reassigned <input type="checkbox"/>	05/11/2022 <input type="text"/> <input type="button" value="Add New"/>	
## Group: (You cannot change your group selection unless you clear this entry by erasing the Date Assigned)	<input type="text"/> <input type="button" value="🔍"/> <input type="button" value="🗑️"/>	<i>Local patient identifier</i> <input type="text"/>
## Select the reason for the assignment/reassignment	Original/Initial Assignment <input type="button" value="v"/>	
^ Authorized Reporter	<input type="text"/>	<i>Phone number</i> <input type="text"/>
## Classification status	Under investigation <input type="button" value="v"/>	
Notes	<input type="text"/>	

eCR Case Report Tracking

- eCR attachments delete after 60 days
- You can identify the date an eCR was received and the facility that sent the eCR in the Administrative package

Electronic Case Report Tracking (eCR)	
eCR received date <input type="checkbox"/>	<input type="text" value="05/11/2022"/>
Sending facility name	<input type="text" value="Test Facility"/>
eCRs are included as attachments to the events and are available for 60 days. After 60 days, the eCR attachment will be deleted.	

Utilizing eCR Information

eCR information

- What is included in an eCR?
 - Most eCRs will include some combination of the following:
 - Demographics
 - Clinical Notes
 - Medications
 - Reason for Visit
 - Treatment
 - Results
 - History
 - Encounter Details
 - Vaccine Info

REASON FOR VISIT

Reason	Comments
Sore Throat	C/o sore throat, nasal congestion, headache, fever, and chest congestions. Home test positive but doesn't know if it is accurate. Needs work note
Congestion	

RESULTS

- (ABNORMAL) COVID-19 PCR (04/16/2022 9:46 AM EDT):

Component	Value	Ref Range	Performed At	Pathologist Signature
SARS-CoV-2 PCR	POSITIVE (A)	Negative	UNCH REX LABORATORY	

Specimen

Nasopharyngeal Swab - Nasopharyngeal structure (body structure)

Narrative

UNCH REX LABORATORY - 04/16/2022 9:32 PM EDT

Testing was performed using the HOLOGIC Panther system Aptima SARS-CoV-2 test. Performance characteristics have been verified by UNC REX Healthcare Laboratories. A negative result does not rule out the possibility of infection and should be used in conjunction with other clinical findings as well as patient history. ⚠ This test has not been FDA cleared or approved, and has been authorized by FDA under an Emergency Use Authorization (EUA). This test is only authorized for the duration of time the declaration that circumstances exist justifying the authorization of the emergency use of in vitro diagnostic tests for detection of SARS-CoV-2 virus and/or diagnosis of COVID-19 infection under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.
