Linking Events

When a contact is named during an investigation, the contact should be linked to the case patient's event in NCEDSS in one of two ways.

- 1. Link to an existing event (contact or case)
- 2. Create a linked event/person

Determining Type of Link in NCEDSS

When a contact is named during an investigation, always conduct a person search first in NCEDSS to see if the person exists already in the application

- If the person exists, determine if they have an existing event of the disease.
 - If there is an existing event of that disease, copy the Event ID to link to the existing event
 - If you cannot see any events, reach out to the county of residence or to the Helpdesk to determine if an event share is appropriate
 - If there are no existing events, copy the Party ID, you will create a linked contact event for the existing person
- If the person does not exist, you will create a linked contact event for a new person

Linking Direction

Event Summary

Event ID:	103258985
Disease:	Monkeypox (72)
Person:	TestCase MonkeyPox Birth Date: 05/14/2000 (22 Male)
Туре:	Interactive
Investigation Status:	Open
Linked Events/Contacts:	0 linked event(s)/contact(s) (View)
Attachments:	0 attachment(s) (Add)
Notifications:	Classification: Confirmed
	Event is in workflows [View List]
	County of residence: Wake County

Once you have searched and determined the type of link you need to create, always return to the case patient's event (the event of the person who named the contact).

Update Contact Event

If you create a new event, you must open the event and update applicable fields, including the Administrative package. Please ensure you document the Disease Report Information and complete the Investigation Trail.
