PREPARING FOR THE INVESTIGATION

Know the Agent

- Carbon monoxide is a colorless, nonirritating, odorless, and tasteless gas.
  - Read about carbon monoxide in the Carbon Monoxide Fact Sheet.
  - For additional information, visit: www.atdsr.cdc.gov/substances/toxsubstance.asp?toxid=253

- Contact:
  - Public Health Preparedness & Response Branch (PHP&R): 888.820.0520
  - NC Emergency Management Desk: 1.800.858.0368. If appropriate, contact local Emergency Management.

- Print and review form:
  - Chemically Exposed Persons Line List

CONDUCTING THE INVESTIGATION

Evaluate Release

- Define scale/scope of release (work with N.C. Emergency Management, HazMat, an Environmental Health Specialist at the local or state level, N.C. Department of Environment and Natural Resources (N.C. DENR), and U.S. Environmental Protection Agency (U.S. EPA) if applicable).

Identify Route of Human Chemical Exposure

- Identify route of exposure:
  - Inhalation
  - Ingestion
  - Dermal (Skin)
  - Injection

- Interview responders and/or exposed
### Describe Exposed Population

- Determine the following:
  - Geographic area affected.
  - Population affected (general population, employees, and residents).
  - How population exposed (in vicinity, inhalation, or direct contact).
  - Define cases within the exposed population.
  - Contact OEEB (919.707.5900) to assist in developing a risk assessment to be shared with officials.
  - Once completed, provide OEEB with the Chemical Exposed Person Line Listing.

### Implement Control Measures to Prevent Additional Exposures

- Decide on measures to protect citizens and the surrounding communities.
- The environmental health specialist will consult with OEEB to discuss next steps to ensure no additional individuals are exposed.
- Inform residents/businesses of the carbon monoxide release through local emergency notification system, local TV and radio. Important points to include:
  - Location of release.
  - Geographic area affected.
  - Shelter-in-place instructions.
  - Where to evacuate if needed.
  - Where to find shelter.
  - Where to seek medical care.
  - For more information, please listen to your local radio station or watch your local news channel.
- Work with your local incident management team and local health director to determine steps to be taken to re-enter residences/businesses.
  - The local incident management

</table>
| **Case Finding** | • During the course of the investigation, interview other exposed individuals for symptoms related to the carbon monoxide release.  
  o Work with your local medical facilities, local incident management team and/or the first responders to compile the exposed persons’ information.  
• Advise symptomatic individuals, especially children, to see their healthcare provider immediately for evaluation.  
• Once interviews are complete, communicate with:  
  o Local hospitals to determine total number injured, hospitalized, ED visits, and deceased.  
  o N.C. DETECT, North Carolina’s state syndromic surveillance system for additional information: 919.843.2361. |
| **Routine Precautions** | • Communicate the following control measures with resident/business owners.  
  o Open all windows once residences/businesses are re-entered.  
  o Contact a veterinarian if pets or farm animals show symptoms of exposure. |
