Acute Pesticide-Related Illness and Injury Surveillance Program

The Pesticide Illness and Injury Surveillance Program monitors pesticide-related illness and injury. Reporting ensures that incidents are recorded and enhances prevention of pesticide-related illnesses and injuries. When we learn about your patient, we can offer resources to help prevent further exposure. Your reports also help Public Health to initiate investigations to identify factors contributing to hazardous exposures and to then make recommendations about safe handling practices. Through collaboration, we can help protect the health of those who live and work in our state.

Physician Reporting: Pursuant to N.C. 10A NCAC 41F .0101 - .0103 physicians (to include physician assistants and nurse practitioners) are required to report confirmed or suspected cases of acute pesticide-related illness or injury within **48 hours** of diagnosis, immediately for cases resulting in death. Please complete the information requested on the reverse of this page for cases which fit the above description. Enter any additional information that you feel is relevant in the comment section. Examples include factors contributing to exposure, activities performed during time of exposure, tests conducted, etc. All information reported is considered confidential, identifying information is protected within the confidentiality guidelines for the Epidemiology Section, NCDHHS. *Physicians may call Carolinas Poison Center to report a case to fulfill reporting requirements @ 1-800-222-1222 Option 5.*

For Questions Regarding Pesticide Toxicology or Clinical Management, Call: Carolinas Poison Center (CPC) 1-800-222-1222; National Pesticide Information Center (NPIC) 1-800-858-7378; or the N.C. Division of Public Health toxicologist or medical epidemiologist (MD) at 919-707-5900.

Need More Information?: Information about reporting requirements, pesticides, and available resources can be found at www.ncdhhs.gov (click P for pesticides under Topic Index).
